Indexes to Volume 19 (1984)

The abbreviation (R) is used after the page concerned to indicate Reviews. (D) indicates Discussions

Subject Index

Abrasive wear of thick silica films prepared by vacuum evaporation, 2671

Activation energies for superplastic tensile and compressive flow in microduplex α/β copper alloys, 3602

Adhesion and durability of metal–polymer bonds, 2431 (R)

Adhesion of ice to a flexible substrate, 73

Advanced theory of the strength of hybrid composites. An, 974

Ageing of (Pb, La)(Zr, Ti)O_3 ferroelectric ceramics and the space charge arising on hot poling, 2555

Alkali resistance non-silicate porous glass-like material, 1109

Analysis of black layers on steel using conversion electron Mössbauer spectrometry, 2664

Analysis of cellulose networks by the finite element method, 3945

Analysis of microdeformations in a structure of polycrystals, 1486

Analysis of the effect of embedded fibre length on fibre debonding and pull-out from an elastic matrix Part 1 Review of theories, 861

Analysis of the effect of embedded fibre length on fibre debonding and pull-out from an elastic matrix Part 2 Application to a steel fibre–cementitious matrix composite system, 1680

Anisotropy of ultra-high modulus polymers drawn through a die, 2615

Annealing studies of cold-rolled Ni_3Al, 1799

Anomalous creep behaviour of a Ni–22 at % Cu alloy and the miscibility gap, 1672

Application of a geometric model to the hydrides of FeTi, 316

Application of fracture mechanics to heterogeneous systems – prediction of fatigue life of ceramics, 159

Application of X-ray photoelectron spectroscopy to the study of polymer-to-metal adhesion Part 2 The cathodic disbondment of epoxy coated mild steel, 2259

Application of X-ray photoelectron spectroscopy to the study of polymer-to-metal adhesion Part 3 The influence of substrate surface chemistry on the cathodic disbondment process. The, 3459

Behaviour of 316L stainless steel in hydrogen. The, 1540

Bending strength and static fatigue of glass fibre in different atmospheres by fibre loop test, 2481

Biocompatibility of magnesia-partially stabilized zirconia (Mg–PSZ) ceramics, 3224

Bonding in wood fibre–cement composites, 3355

Butt-fusion welding of PVDF and its composites Part 1 The butt-fusion of PVDF pipe systems. The, 645

Butt-fusion welding of PVDF and its composites Part 2 The reinforcement and welding of PVDF with short carbon fibres. The, 653

Calculation of deposition conditions for Si_3N_4 from a SiL_4–NH_3 gas phase (L = H, Cl, Br, CH), 3079

Calculations of impact stresses in polycrystalline graphite rods, 1930

Carbides in iron-rich Fe–Mn–Cr–Mo–Al–Si–C systems, 965

Changing the surface mechanical properties of silicon and α-Al_2O_3 ion implantation, 3524

Characterization of brown ferric oxide hydrate xerogel, 3341

Characterization of evaporated tellurium oxide films, 3844

Characterization of microcracks in $YCrO_3$ using small-angle neutron scattering and elasticity measurements, 2962

Characterization of microstructural anisotropy in orthotropic materials using a second rank tensor, 761

Characterization of striations in polyethylene single crystals, 2989

Characterization of the microstructure of a commercial Al–Cu alloy (2011) by differential scanning calorimetry (DSC), 279

Coaxial line methods for measuring permittivity and dielectric loss, 915

Co-carbonization behaviour of Chinese coals with pitch additivies. The, 3311

Coefficients for equilibrium partition of a third element between solid and liquid in iron–carbon base ternary alloys and their relation to graphitization during iron–carbon eutectic solidification, 2306

Coercivity dependence of a $Sm_2(Co, Cu, Fe, Zr)_{17}$ type alloy on magnetic processing procedure, 353

Comment on "Structural characterization of rapidly solidified white cast iron powders", 692 (D)

Comments on "Rigorous determination of kinetic parameters from DTA measurements", 345 (D)

Comments on "Rigorous determination of kinetic parameters from DTA measurements", 689 (D)

Comments on "The question of emission of charged particles in failure of solids", 2423 (D)

Compatibility between carbon fibre and binary aluminium alloys, 3107

Composite materials made from a porous 2D-carbon–carbon preform densified with boron nitride by chemical vapour infiltration, 202

Composite rheology Part 2 Effect of filler on the mechanical properties of filled elastomers, 2997

0022–2461/84 $03.00 + .12 © *1984 Chapman and Hall Ltd.*

Composition and structure of boride layers grown on low-manganese ternary iron alloys, 4035
Compressive and torsional behaviour of Kevlar 49 fibre, 57
Compressive surface strengthening of brittle materials, 2165
Computational techniques for stereographic projection, 4106
Conductive silver–epoxy pastes: characteristics of alternative formulation, 3281
Constitutive equations for inhomogeneous plastic flow and application to Lüders band propagation, 1496
Control of the electrical conductivity of germanium vanadate glasses by the admixture of chlorine during preparation. The, 1563
Conversion of phenol formaldehyde resin to glass-like carbon, 1022
Correlation between electron spin resonance, electrical conductivity and optical absorption edge of co-evaporated thin films of the dielectric system SiO/V_2O_5, 3687
Correlation between resin material variables and transverse cracking in composites, 2278
Corrosion in H_2/H_2S mixtures of a $Ni_{77}Cr_{16}Fe_7$ alloy previously covered with an external Cr_2O_3 layer, 815
Corrosion resistance of high ZrO_2 fusion-cast Al_2O_3–ZrO_2–SiO_2 glass refractories in soda lime glass. The 1272
Crack extension and arrest within the particle subjected to tensile thermoelastic stresses in brittle matrix composites, 4119
Crack propagation in a glass particle-filled epoxy resin Part 1 Effect of particle volume fraction and size, 473
Crack propagation in a glass particle-filled epoxy resin Part 2 Effect of particle–matrix adhesion, 487
Crack-size dependence of fracture toughness in transformation-toughened ceramics, 2233
Craze development and breakdown in PVC during cyclic loading, 1116
Craze formation in ABS, 2643
Creep and glass transition behaviour of fractionated petroleum pitches: the influence of molecular weight and its distribution, 2651
Creep and stress-relaxation, in ultra-high modulus linear polyethylene, 629
Creep behaviour and structure characterization at high temperatures of Nicalon SiC fibres, 3658
Creep behaviour of a 25 wt% Cr–20 wt% Ni austenitic stainless steel doped with antimony, 263
Creep trajectories for beech during moisture changes under load, 1456
Crystallization and morphology of a bacterial thermoplastic: poly-3-hydroxybutyrate, 2781
Crystallization and properties of glasses prepared from Illinois coal fly ash, 1760
Crystallization of aluminium orthophosphate, 2855
Crystallization of an Fe–Co based metallic glass, 1535
Crystalization process of cubic ZrO_2 in calcium acetate solution, 2921
Cyclic modulation of moving cracks in glassy polymers by ultrasonic shear waves, 527

Deformation stress of highly brittle explosive crystals from real contact area measurements. The, 3028
Degradation of Mn-doped $BaTiO_3$ ceramic under a high d.c. electric field, 3515
Densification of sintered lead zirconate titanate by hot isostatic pressing, 1530
Detailed structure of delamination fracture surfaces in graphite/epoxy laminates. The, 1171
Determination of diffusivity of sodium in liquid tin using Na–β'' alumina, 213
Determination of single fibre strength distribution from fibre bundle testings, 3319
Determination of transient creep parameters for HPSN by dynamic bending tests, 1791
Diamond formation and behaviour of carbides in several 3d-transition metal–graphite systems, 259
Dielectric constant of silver-thermosetting polyester composites, 4093
Dielectric properties of polycrystalline $CaTiO_3$ doped with yttrium oxide, 737
Diffraction studies of β''-magnesium sialon, 1726
Diffusion bonds in copper, 3140
Diffusion bonds in iron and a low-alloy steel, 3149
Diffusion in the CuSn binary system: application to Nb_3Sn composites, 497
Diffusion model for the oxidation of hot pressed Si_3N_4–Y_2O_3–SiO_2 materials. A, 1029
Diffusion of ions through water-saturated cement. The, 3068
Discontinuous precipitation in Cu–Mg alloys, 3013
Dislocation arrangement in the plastic zone of propagating cracks of nickel, 2273
Dislocation motion in MgO crystals under plate impact, 1428
Dislocations in energetic materials Part 3 Etching and microhardness studies of pentaerythritol tetranitrate and cyclotrimethylenetrinitramine, 1629
Double-torsion study of the fracture of polyethersulphone. A, 3796
Dynamic mechanical properties of paper: effect of density and drying restraints, 2955
Dynamic subgrain coalscence during low-temperature large plastic strains, 423

Effect of a.c. frequency on precipitation in Al–5.6 at % Zn. The, 3935
Effect of annealing on the superconducting properties of two amorphous alloys: $Nb_{70}Zr_{15}Si_{15}$ and $Zr_{80}Si_{20}$, 2719
Effect of cathodic charging current density on the apparent hydrogen diffusivity through pure iron, 2633
Effect of cold rolling on the superconducting and electronic properties of two amorphous alloys: $Nb_{50}Zr_{35}Si_{15}$ and $Nb_{70}Zr_{15}Si_{15}$, 1251
Effect of cold working and ageing treatment on ductility of an Al–6.0% Zn–2.6% Mg alloy at 4.2 and 293 K, 1007.
Effect of cross-linking on fracto-emission from elastomers. The, 1510
Effect of edge stresses on the failure of (0°, 45°, 90°) CFRP laminates. The, 167
Effect of grain size and orientation on the initial permeability of 36 wt% Ni–Fe alloys, 4099
Effect of irradiation on the mechanical properties of com-

mercially produced Nb_3Sn tapes, 2875
Effect of irradiation particle mass on crystallization of amorphous alloys, 1818
Effect of magnetic iron impurity on the superconducting properties of an amorphous $Nb_{80}Zr_{13}Si_{18}$ alloy, 3739
Effect of microcracking upon the Poisson's ratio for brittle materials. The, 3702
Effect of pore size and heat treatment on the fracture toughness of pressed and sintered Ancology SA powdered steel. The, 2073
Effect of pre-treatment and annealing temperature on the strength of SiC-Ni monofilament composites, 3430
Effect of sliding friction forces on the strength of brittle materials, 2561
Effect of solidification conditions on deformation behaviour of semi-solid Sn–Pb alloys, 3995
Effect of strain, strain rate and temperature on cavity size distribution of super-plastic copper-base alloy, 1321
Effect of surface oxide layers on the oxidation behaviour of imidazole-treated copper. The, 2323
Effect of temperature and strain rate on the strength of a PET/glass fibre composite, 2246
Effect of temperature on deformation and fracture of notched polymers, 1863
Effect of temperature on the strength and fatigue behaviour of optical fibres, 4087
Effect of the main processing parameters on the geometry of amorphous metal ribbons during planar flow casting (PFC). The, 3229
Effect of the partial pressure of water vapour on the thermal decomposition of γ-FeOOH and on the dispersity of the solid decomposition product, 183
Effect of thermal stabilization on the optical absorption of some transition metal ions in glass, 794
Effect of titanium additions on M_s of β-CuZn. The, 1343
Effect of titanium on the structure and mechanical properties of Cu–Al–Ti alloys, 24
Effect of ZrO_2 on the alkali feldspar–aluminosilicate interface, 44
Effects of ageing after cathodic charging in austenitic stainless steels, 3873
Effects of amorphous phase separation on crystal nucleation kinetics in $BaO–SiO_2$ glasses Part 1 General survey. The, 1406
Effects of amorphous phase separation on crystal nucleation kinetics in $BaO–SiO_2$ glasses Part 2 Isothermal heat treatments at 700° C. The, 2894
Effects of boron addition on a melt-spun Ni-based superalloy, 1220
Effects of crystallinity of starting carbons on diamond formation in the presence of nickel under high pressure and high temperature conditions, 1153
Effects of elemental additions and superheat on melt surface tension and metallic glass embrittlement, 1391
Effects of magnetic quenching on glassy barium ferrite. The, 1277
Elastic anisotropy and the grain size dependence of ceramic fracture energies, 1267
Elastic flow instabilities and shish-kebab formation during gel-spinning of ultra-high molecular weight polyethylene, 31
Elastic stiffness constants and their hydrostatic pressure derivatives for TGS. The, 125
Electrical conduction of erbium fluoride thin films, 2401
Electrical conductivity/microstructural relationships in aged CaO and CaO + MgO partially-stabilized zirconia, 785
Electrical conductivity of single crystal and polycrystalline yttria-stabilized zirconia, 1767
Electrical properties of ceramics in the system $Li_2O–ZnO$, 2493
Electrical properties of La-doped $SrTiO_3$ (La: 0.1 to 2.0 at %) single crystals grown by xenon-arc image floating zone method, 3671
Electical properties of $(Ni_{1-x}Li_x)O$ ($x = 0.1$ and 0.2) under various relative humidities, 3347
Electrical transport and semiconductor–semi-metal transition in $LaVO_4$, 3325
Electrical transport in copper chromite catalyst, 3350
Electron-beam rapid quenching of an ultra high-strength alloy steel, 3760
Electron emission measurements and the defect structure of α-Al_2O_3, 2121
Electron-microscopical observation of crystal growth in amorphous $Fe_{75}B_{25}$ alloy, 3375
Electron microscopy and X-ray diffraction study of the microstructures of melt-drawn polyethylene films. An, 2098
Electron probe microanalysis of nickel and chromium in Fe–C–Ni and Fe–C–Cr alloys borided at 850° C, 3732
Electron spin resonance and some electrical and optical properties of GeO_2/SiO_x thin films, 1505
Electron spin resonance in phosphate glasses containing mixed transition metal ions, 1420
Elevated temperature deformation behaviour of alpha–beta brass bicrystals Part 1 Ordered beta, 3185
Elevated temperature deformation behaviour of alpha–beta brass bicrystals Part 2 Disordered beta, 3191
Elevated temperature deformation behaviour of alpha–beta brass bicrystals Part 3 Supporting studies, 3196
Embrittlement of Sn–Al eutectic alloy in water vapour. The, 599
Energy absorption in blends of polycarbonate with ABS and SAN, 1699
Enthalpy relaxation behaviour of $(Fe, Co, Ni)_{75}Si_{10}B_{15}$ amorphous alloys upon low temperature annealing, 3953
Environmental durability of aluminium adhesive joints protected with hydration inhibitors, 223
Environmental effects of silicone oil on mechanical properties of low and high molecular weight PMMA, 3967
Environmental response of hybrid composites. The, 1969
Epitaxial crystallization of selenium on linear polyphenyls, 1439
ESR and Mossbauer studies of the precipitation process of various ferrites from silicate glasses, 2353
Estimation of Weibull parameters by omission of some data in a sample, 4021
Evaluation of acoustic emission from fibre-reinforced composites Part 1 Acoustic emission interpretation of epoxy matrix and model composites containing glass

beads, carbon and glass fibres, 1777
Evaluation of flow parameters in transformation plasticity of an Sn–5 wt % Cd alloy, 3276
Experimental investigation into the formation of an equiaxed zone *in* ingot casting: Pb–Sb alloy system. An, 2289
Experimental observations of the strain distribution around a matrix crack bridged by reinforcing members and its effect on tensile fracture, 3407

Fabrication of fibre composites using an aluminium superplastic alloy as matrix, 2488
Factors influencing structural evolution in the oxide of hot-pressed Si_3N_4–Y_2O_3–SiO_2 materials, 3487
Failure mode and interface chemistry of localized coatings on brass, 3217
Failure modes and fracture mechanisms in flexure of Kevlar–epoxy composites, 377
Failure processes in elastomers at or near a rigid spherical inclusion, 1947
Fatigue crack advance mechanisms in polymers Part 2 Semicrystalline polymers for $T < T_g$ (polybutylene terephthalate), 385
Fatigue crack closure and its dependence on fracture features, 1836
Fatigue crack growth behaviour of Ti–6Al–4V metal matrix/continuous SiC and B_4C/B fibre composites, 2239
Fatigue in low-strength silica optical fibres, 3416
Fatigue properties of dynamically consolidated aluminium. The, 3498
Fe–Si–B amorphous alloys with high silicon concentration, 4125
Filament contact with *in situ* Nb_3Sn superconducting wire, 2459
Flexural studies of carbon fibres, 3201
Formation, structural and optical properties of tellurium oxide films deposited by a plasma process (PARBAD), 2368
Fracture of acrylic polymers in water. The, 1904
Fracture of ceramics with surface flaws introduced by Knoop indentation, 672
Fracture of particulate-filled epoxide resins. The, 1125
Fracture of translucent alumina: temperature dependence and influence of CaO dope, 2195
Fracture process of ultra-high strength polyethylene fibres. The, 1359
Fracture toughness of Kevlar–epoxy composites with controlled interfacial bonding, 1638
Fracture toughness of tough polyethylenes by a novel high pressure technique. The, 413
Free radicals in γ-irradiated PETN, 467

Glass formation and crystallization in the $GeSe_2$–Sb_2Te_3 system, 3005
Glow curves and the emission of flux-grown BaFCl:Na crystals, 2454
Grain-boundary migration in single-phase and particle-containing materials, 3554
Grain-boundary segregation of copper, tin and antimony in C–Mn steels at 900° C, 2136
Grain shape and distribution of the grain-boundary in polycrystalline materials, 3249
Growth of Nb_3Sn in multifilamentary bronze composites, 2057

*Heat flow model of rapid solidification with nonhomo*geneous thermal contact, 2145
Hertzian indentation of sintered alumina, 254
High energy radiation effects on ultimate mechanical properties and fractography of nylon 6 fibres, 82
High-frequency dielectric properties of Mg–Al–Si, Ca–Al–Si and Y–Al–Si oxynitride glasses, 3211
High modulus filaments of polyethylene with lamellar structure by melt processing; the role of the high molecular weight component, 3713
High resolution electron microscopy in association with interactive computing, 533
High temperature and pressure preparation and properties of iron carbides Fe_7C_3 and Fe_3C, 2513
High temperature fracture of boron carbide: experiments and simple theoretical models, 457
Hot hardness of $(Fe, Cr)_3C$ and $(Fe, Cr)_7C_3$ carbides, 2546
Hot isostatic pressing of Si_3N_4 with Y_2O_3 additions, 745
Hydration of doped tricalcium aluminate Part 1 Hydration of $Ca_3(Al_{2-x}Fe_x)O_6$ in the presence of gypsum. The, 1980
Hydration of phosphate and borate glasses at high temperatures and pressures, 2705
Hydration of tricalcium silicate in the presence of collodial silica. The, 3477
Hydrogen effects on phase transformations in austenitic stainless steels, 567

Incubation periods and indentation creep in lead, 4057
Indentation testing of nuclear-waste glasses, 2533
Influence of damage on the plastic instability of sheet metals under complex strain paths, 4133
Influence of impurities on the etching of NaCl crystals, 1131
Influence of impurities, such as carbon and sulphur, on the high temperature oxidation behaviour of $Fe_{72}Cr_{22}Al_5$ alloys, 3173
Influence of quenched-in crystals on the thermal stability of partially amorphous $Zr_{76}Ni_{24}$ alloy. The, 4007
Influence of retained austenite on the fatigue endurance of carbonitrided steels, 2980
Influence of solution heat-treatment temperature on the mechanical properties of a recrystallized aluminium alloy 2020. The, 2079
Influence of temperature and stress-relieving treatment of the stress relaxation in bending of Zircaloy-4 near 673 K, 2969
Influence of temperature cycling on the creep properties of Nickel 201 and Inconel 600 in combustion gas. The, 3908
Infrared spectra of CdO–P_2O_5 and CdO–ZnO–P_2O_5 glasses. The, 99
Inherent ductility in amorphous Ta_2O_5 films, 3895
Interaction between MDF cements and tissues. The, 637
Interaction of sodium with simple glasses Part 2 Na_2O–SiO_2 and Na_2O–Al_2O_3–SiO_2, 881
Intercrystalline cracking, grain-boundary sliding and delayed elasticity at high temperatures, 359

Interdependence between the incidence angles associated with quasi-stable intersections during ion erosion. The, 2153
Interfacial reactions between SiC and aluminium during joining, 1692
Interference optical measurements during continuous and discontinuous crack propagation in fatigue loaded polymers, 1605
Internal oxidation of Fe–Si alloys in γ-phase region, 3451
Investigation of models for hydrogen attack of steel, 2771
Investigation of the influence of cold-rolling on the structure factor of a metallic glass. An, 1374
Investigation of the nature of micro-indentation hardness gradients below sliding contact in five copper alloys worn against 52 100 steel, 1957
Investigation of the surface morphology of ion-bombarded biocompatible materials with a SEM profilograph, 2845
Isothermal decomposition of the β′ phase in a Cu–Zn–Al alloy, 2465

Kinetics of dissolution of silicon in CrO_3–HF–H_2O solutions, 1314
Kinetics of non-isothermal crystallization process and activation energy for crystal growth in amorphous materials, 291

Lamellar crystallization of pendant chains in radiation-crosslinked polyethylene fibres, 428
Laser alloyed tin layers on GaAs, 2361
Laser energy window for ion-implanted GaAs. The, 3887
Laser surface alloying: a bibliography, 3815 (R)
Linear shaped-charge (LSC) collapse model, 3049
Linearrized equations for the electronic transport properties of thin metal films, 4138
Load relaxation of stainless steel Type AISI 304 near 563 K, 2373
Low temperature deformation behaviour of ASTM A-203D nuclear structural steel, 1446
Low temperature preparation of stabilized zirconia, 49
Low temperature synthesis of glassy solids of the system Al_2O_3–P_2O_5–SiO_2, 396

Magnesium diffusion, surface segregation and oxidation in Al–Mg alloys, 2336
Magnetic domain structure of isotropic MnAlC permanent magnet alloys, 1261
Magnetic measurements on iron-rich amorphous alloys containing chromium: Mössbauer study and *B–H* loops, 1000
Magnetic properties of Cu–Cd ferrite investigated by Mössbauer spectroscopy, 1622
Mathematical description of transient crack growth behaviour in glass. A, 2570
Measurement of thin-layer surface stresses by indentation fracture, 4061
Mechanical and structural characterization of the Nicalon silicon carbide fibre, 3649
Mechanical models to describe the behaviour of polyaramid fibres, 2387
Mechanical properties and tensile failure mechanism of a high strength polymer modified Portland Cement. The, 2677
Mechanical properties of rubber compounds containing soft fillers Part 1 Tensile properties and fracture morphology, 3059
Mechanical properties of rubber compounds containing soft fillers Part 2 Tear properties. The, 3330
Mechanical properties of ultra-high molecular weight polyethylene fibres in relation to structural changes and chain scissioning upon spinning and hot-drawing, 3443
Mechanical reliability of ceramic windows in high frequency microwave heating devices Part 1 An analysis of temperature and stress distributions, 3767
Mechanical reliability of ceramic windows in high frequency microwave heating devices Part 2 Mechanical behaviour of the ceramics, 3778
Mechanisms of fracture of short glass fibre-reinforced polyamide thermoplastic, 1145
Mechanism of high energy absorption by foamed materials–foamed rigid polyurethane and foamed glass, 871
Metallographic investigation of the damage caused to GRP by the combined action of electrical, mechanical and chemical environments, 1596
Metallurgical reaction and deposit fusion boundary microstructure under a stationary plasma arc, 3855
Microhardness and brittle fracture of garnet single crystals, 1159
Microhardness measurements on single crystals of flux-grown rare earth perovskites (orthoferrites, orthochromites and aluminates), 2582
Micromechanics of fracture in elastomers, 3612
Micromechanisms of crack initiation in thin films and thick sections of polyethylene , 2519
Microstructure and mechanical properties of mullite/ZrO_2 composites, 2909
Microstructure and mechanical properties of rapidly quenched $L2_0$ and $L2_0 + L1_2$ alloys in Ni–Al–Fe and Ni–Al–Co systems, 3097
Microstructure evolution and ordering in commercial Mg–PSZ, 2934
Microstructure of carbonaceous mesophase spherule, 270
Microstructure-property correlation in martensite–austenite mixtures, 3043
Microstructures and superconducting properties of *in situ* V_3Ga composite prepared by external diffusion process, 2172
Modification in tin–antimony alloys, 3880
Morphological and magnetic changes during mechanochemical transformation of lepidocrocite to hematite, 1556
Mössbauer studies of the effect of nucleating agents on the crystallization of YIG in the Na_2O–SiO_2–Y_2O_3–Fe_2O_3 glass system, 3021
Mössbauer study of iron in β-silicon nitride–effects of heat treatment and γ-irradiation, 1749

Nature of interfacial interaction mechanisms between polyacrylic acid macromolecules and oxide metal surfaces, 4045

Neutron and X-ray diffraction studies on pure and magnesia-doped zirconia gels decomposed in vacuo, 1349
New method for low temperature preparation of barium hexaferrite powders. A, 121
New methods to prepare high-purity silica, 1710
Ni_3Al–Ni_3Cr–Ni_3Mo section of the Ni–Cr–Al–Mo system. The, 3574
Nitrocarburizing of low-carbon unalloyed steel Part 1 Mechanical properties, 1089
Nitrocarburizing of low-carbon unalloyed steel Part 2 Positron annihilation studies, 1099
Nucleation behaviour of poly-3-hydroxy-butyrate, 3826
Nucleation kinetics in a glass–ceramic enamel, 233
Nucleation studies in supersaturated potassium dihydrogen orthophosphate solution and the effect of soluble impurities, 2837

Observation and compositional studies of the metallic conducting filaments in the low-resistance state (ON-state) of SiO/V_2O_5 thin films used as memory elements, 1939
Occurence of shear bands in the order–disordered FeCo–2V alloy, 949
On the ageing of an aluminium–lithium–zirconium alloy, 3835
On the factors affecting strength of Portland Cement, 150
On the lubrication and wear of metal by rubber, 585
On the morphology of blends of linear and branched polyethylene, 447
On the nature of plastic deformation generated by hydrostatic pressure in silicon single crystals, 3399
On the work hardening behaviour of metallic materials with spherical second-phase particles at high temperatures, 3976
Optical absorption and thermoluminescene of barytes single crystals irradiated with γ-rays, 1666
Optical absorption edge of amorphous thin films of silicon monoxide. The, 1737
Oxidation mechanism of porous silicon nitride, 1283
Oxidation–reduction behaviour of La-doped $SrTiO_3$, 2593
Oxide morphology and adhesive bonding on titanium surfaces, 3626
Oxygen activity dependence of the defect structure of La-doped $BaTiO_3$, 3159
Oxygen self-diffusion in single and polycrystalline magnesio-ferrites, 2948

Particle condensation in metallic vapour plumes, 3437
Permittivity and dielectric loss of reaction-bonded silicon nitride. The, 3680
Phase equilibria and ordering in the system HfO_2–Yb_2O_3, 1178
Phase equilibrium, glass-forming, properties and structure of glasses in the TeO_2–B_2O_3 system, 403
Phase transformation $\beta \rightarrow \alpha$ in sintered SiC involving feathers formation Part 1 Microstructure, 4077
Phase transitions in cuprous sulphide evaporated thin films, 113
Phenomenology of fracture in sintered alpha silicon carbide, 2111
Photoluminescence studies of sintered diamond compacts, 2405
Physical interpretation of the parameters measured during the tensile testing of materials at elevated temperatures. The, 1568
Plastic deformation of β and γ phase silver–tin alloys, 3255
Poisoning of silver zeolite by organics. The, 2870
Polarity reversal and symmetry in semiconducting compounds with the sphalerite and wurtzite structures, 439
Polyarylates: thermal stability in air, 347
Polymetric materials having a porous structure prepared by radiation polymerization, 1616
Polymorphic transformation of titanium dioxide by mechanical grinding, 1397
Pores as fracture origins in ceramics, 895
Possibility for developing high strength soft magnetic material in FeCo–X alloys. A, 2575
Precise evaluation of fast fracture velocities in acrylic polymers at the slow-to-fast transition, 4026
Preparation and characterization of alumina membranes with ultra-fine pores Part 1 Microstructural investigations on non-supported membranes. The, 1077
Preparation and properties of $HZr_2P_3O_{12}$ and related compounds, 2691
Preparation and superconductivity of NbN powder by a vapour phase reaction, 2915
Preparation of ferroelectric PZT films by thermal decomposition of organometallic compounds, 595
Preparation of indium phosphide layers by chloride–hydride reactions. The, 2211
Preparation, temperature and composition dependences of some physical and electrical properties of mixtures within the NiO–Mn_3O_4 system, 545
Probabilistic aspects of strength of unidirectional fibre-reinforced composites with matrix failure, 574
Probabilistic initial failure strength of hybrid and non-hybrid laminates, 3546
Probabilistic theory for the strength of discontinuous fibre composites. A, 1805
Production of metal–zirconium type amorphous wires and their mechanical strength and structural relaxation, 3786

Radiation damage and high resolution electron microscopy of polydiacetylene crystals, 327
Rapidly quenched sodium tungsten bronzes, 2219
Reaction of Al/Mo thin films, 1339
Reactive processing of titanium carbide with titanium Part 1 Liquid-phase sintering, 1229
Reactive processing of titanium carbide with titanium Part 2 Solid-state hot pressing, 1242
Rearrangement phenomenon developed inside powder compacts: theoretical mode expressing the associated shrinkage, 2599
